SUMMARY

Software Engineer working as a senior frontend developer, with 2+ years of professional experience building multi-role web platforms with React, Next.js and TypeScript. Strong problem-solving foundation from competitive programming: 1,500+ algorithmic problems solved, Codeforces Specialist, and 10th place individually in the Aleppo Collegiate Programming Contest. On the backend, I work with Node.js and NestJS. At Kadnya, I develop the creator control panel, website builder, subscriptions, payments and role-based access for an Arabic platform where experts sell courses and digital products. On the founding team of Tredro, I built a company dashboard, a sales-rep app and a customer app, shipped to web and Android with Capacitor. Experienced with micro-frontends, third-party integrations (payment gateways, Zoom, SDKs), real-time features and remote teams.

EXPERIENCE

Frontend Developer, Kadnya | Remote — Jul 2025 – Present

Arabic all-in-one platform where experts and academies sell courses, sessions and digital products (Saudi market).

- Develop the creator control panel used to manage products, students, orders and invoices, using Next.js and TypeScript.
- Built the website builder that lets creators launch a branded personal site with their own logo, colors, fonts and pages.
- Implemented subscription plans, pricing and payment gateway integrations.
- Implemented role-based access control (Admin, Instructor, Student) within a micro-frontends architecture.
- Integrate frontend features with backend REST services and third-party services.

Frontend Developer (Founding Team), Tredro | Syria — 2026 – Present

Wholesale distribution platform connecting distribution companies, field sales reps and supermarkets.

- Helped shape the product's scope through conversations with people in the distribution chain.
- Built all three applications: a company dashboard (reps, customers, products, orders, invoices, warehouses, permissions, KPI dashboards), a sales-rep app (daily routes, GPS check-in, invoicing, offline mode with sync) and a customer ordering app.
- Packaged the web apps as Android apps with Capacitor, shipping one codebase to browser and mobile.

Frontend Developer, Nebu | Remote (Malaysia) — Jan 2025 – Jun 2025

Cloud account management and security platform for AWS and GCP.

- Built cloud account management and AI-powered compliance report features with Next.js, TypeScript and React Query, including real-time notifications.
- Owned an independent section of the product from implementation to delivery.

Frontend Developer Intern, Ulutech | Aleppo, Syria — Jul 2024 – Dec 2024

- Worked on real-world web projects in a team, using a shared Git workflow.

PROJECTS

Suttor (Graduation Project): Next.js | suttor.vercel.app
Arabic platform for readers and writers: books library with category and author filters, reading progress and notes, an AI reading assistant, a timed quiz that verifies authors, and a management dashboard.

Belawaseet Admin Panel: Next.js, TypeScript, React Query, Firebase | panel.belawaseet.com
Admin dashboard for a property-rental platform with Firebase real-time chat and notifications.

SKILLS

Core: TypeScript, JavaScript, React, Next.js (App Router, SSR), HTML, CSS, Git, GitHub, GitLab
State & Data: TanStack Query (React Query), Redux Toolkit, Zustand, Axios, REST APIs
Forms & Validation: React Hook Form, Zod, Yup
UI: Tailwind CSS, shadcn/ui, Material UI (MUI), Framer Motion, responsive design
Architecture: Micro-frontends, role-based access control, internationalization (i18n: next-intl, i18next)
Integrations: Payment gateways, Zoom, third-party SDKs and APIs
Backend: Node.js, NestJS, Express, MongoDB
Platforms: Firebase, Appwrite, Capacitor

EDUCATION

B.Sc. Information Engineering (Software Engineering), University of Aleppo, Syria — 2026

ACHIEVEMENTS

- 1,500+ algorithmic problems solved on Codeforces, AtCoder and CSES (C++). Codeforces Specialist: Recursive-Thinker
- Aleppo Collegiate Programming Contest 2022–2023: 10th individually in Aleppo; team ranked 6th in Aleppo and 22nd in Syria

LANGUAGES

Arabic (native) | English (professional: C1 reading, writing, listening; B2 speaking)
